can anyone tell me how the 3rd query given 4 instead of 3?

syamphanindra (/users/syamphanindra): 2017-05-04 20:47:49
hey finally after long frustation for a week solved gss1 and gss3

ace_of_spades (/users/ace_of_spades): 2017-04-30 22:15:50
silly mistake -> one week of frustration
and FYI : wrong answer#0 or wa#1 is nothing special. it is simple wrong answer.
check ur code. even i was under the false impression that wa#0 might mean
runtime error or 'some weird error'. Nothing like that.
